

Enterprise Insights Platform Brand & UI System

A calm, data-first visual system for an agentic-AI analytics product. Built for long sessions, dense dashboards, and interpretable, trustworthy AI.

PERSONALITY

Reliable

Interpretable

Trustworthy

Professional

Calm

VISUAL TONE

Clean

Data-first

Minimal ornament

High legibility

Consistent

PRIMARY · NEURAL BLUE

#034BDC

The single dominant brand signal. Use for primary actions, links, active navigation, focus rings, and key highlights. Everything else stays quiet so the data leads. Dark mode lightens this to #60A5FA to hold contrast on dark surfaces.

TYPEFACE

Source Sans 3

One family. Weight and size carry hierarchy.

MODES

Light default

Designed dark mode, not inverted.

DATA

Tabular numerals

All KPIs, tables, metrics align.

Colour tokens

02

Light mode is the default. Every token has a matched dark-mode value on the next page. Pair status colours with icons and labels, never colour alone.

NEUTRALS

Bias Monitor Red #F25C54	Risk Alert Yellow #FFD93D		

Colour tokens · dark mode

Layered dark surfaces reduce glare and build depth. Values are tuned for contrast, not inverted from light.

Source Sans 3 throughout. Hierarchy comes from weight and size, not a second family. Line-height 1.4–1.6 for dense content.

Display / H1
32px · Semibold 600

Insights that explain themselves

H2
24px · Semibold 600

Agent activity this week

H3
20px · Semibold 600

Confidence and data quality

Body Large
16px · Regular 400

The agent reviewed 48,210 records and flagged three segments for human review.

Body Default
14px · Regular 400

Confidence dropped below the review threshold on two data sources. Open the lineage panel to see why.
